1. The following air activity and aircraft were observed at Finsterwalde airfield

September. One high-wing monoplane, 1 biplane, and 21 Il-10s were parked at the field. Between 1 p.m. and 5:30 p.m., there was air activity by Il-10s which took off at intervals of 10 to 15 seconds and, immediately after the take-off, assembled in formation making a left bank. Formation flying was practiced for 30 to 40 minutes.

September and September. October. On all days, there was the same formation flying as on 24 September.

October. No air activity or aircraft were observed at the field.

October. In the afternoon, 18 to 20 Il-10s, 2 biplanes and 1 high-wing monoplane were parked east of the easternmost hangar. Shortly after 1:15 p.m., five Il-10s taxied to the take-off point and took off at short intervals. Immediately after the take-off, the aircraft assembled in wedge formation and remained aloft for about 40 minutes. Formation flying was repeatedly observed in the afternoon.

October. Every afternoon, ground attack aircraft practiced formation flying. a particularly strong guard was being maintained over the field.

October. No air activity or other activity was observed at the field. during this period that no aircraft were parked at the landing field. 2

2. From 10 to 15 soldiers were working on the northern section of the field along the eastern third of the fence, where individual sand hills and unloaded beams were observed.
